DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dukart et al. (hereinafter Dukart) (5,880,586).

As to claims 1 – 10, Dukart discloses an apparatus for determining rotational position of a rotatable element comprising a magnetoresistive or magnetoinductive sensor (30, 31, fig. 5) and a measurement chain (not labeled), one input (32, 33) of which is connected to the magnetoresistive or magnetoinductive sensor (30, 31) and the output (U sub A) of which is able to provide a piece of information representative of the magnetic field in the region of the sensor (30, 31), characterised in that the measurement chain comprises means (34 - 37) for isolating a frequency component of the signal from the sensor representative of the magnetic field for a single predetermined frequency (Col. 7, lines 21 – 23 and lines 28 - 56).
